

SOLUTIONZ CONFERRING, INC.

K-12 Video Solutions

Top Issues facing K-12 Schools and Administrators

- The ability to provide equal access to all courses across the district with a teacher shortage particularly in upper level courses
- The requirement to provide the same level of student services to all campuses while not having increasing personnel funding
- The need for a new student base
- The ongoing struggle with student retention in traditional and online courses
- The need to make courses more rigorous and relevant for today's learners
- The ability to create and store digital content
- The ability for administrators to manage their busy schedules that are inundated with meetings, briefings, regulations, and requirements

With the implementation of a virtual presence – video conferencing – these issues can easily be solved. Educators and administrators alike can meet the demands of a changing education system while eliminating the boundaries of time and distance, thus saving travel, time, and costs.

SOLUTIONZ Training

SOLUTIONZ offers a variety of hands-on training programs that empowers educators to develop distance-learning programs and classroom applications with tips for planning content and delivery.

Offering an unparalleled video solution for educators facing 21st century challenges.

As part of our mission to change the way people communicate, SOLUTIONZ offers educators a number of resources designed specifically to make distance learning programs more successful. Our visual communications products are the best available, but technology alone does not make the only difference in the classroom - it's how educators use it and incorporate it that is important.

Listening to our customers, we know that content for the classroom is of utmost importance, but training those who will be using the technology in the classroom is just as necessary. Today's millennial learners need relevant, interactive content from educators who know how to incorporate it into a living curriculum. This is why SOLUTIONZ offers resources for content access and training - as well as assistance in locating and securing funding.

SOLUTIONZ Content - CILC

Are you interested in using video to connect your students with other students for a collaborative learning project? CILC, a non-profit organization, provides an endless list of K-12 educational video content for schools nationwide and offers:

- Exposure to ethnic, socioeconomic, and geographic diversity
- Over 800 programs from over 150 content providers around the world ranging from foreign languages, astrology, geography, history, and more
- Programs aligned with national K-12 curriculum standards
- Ratings of each program based on educator evaluations

Grant Services

Each year, the U.S. Federal government awards millions of dollars in grant funding to schools and libraries for the purchase of new technologies, such as visual communication solutions.

From consultations on available funding sources to grant application assistance, SOLUTIONZ has extensive experience helping schools and libraries secure funding for visual communication solutions that support distance learning.

About E-Rate

Today, America's K-12 entities are constantly plagued with diminishing resources and shrinking budgets. Schools are challenged with obtaining the necessary technology to keep up with rising standards of child education and development. Through the E-Rate Program, the Schools & Libraries Division (SLD) of the Universal Service Administration Company (USAC) provides schools and libraries with discounts for advanced telecommunications technology and internet access.

About Rural Utilities Services (RUS)

Advanced telecommunications services have become vital to the economic development, education, and health care of rural Americans. The Rural Utilities Service's (RUS) Distance Learning and Telemedicine (DLT) Program is specifically designed to meet the educational and health care needs of rural America through the use of advanced telecommunication technologies.
