Clinical Assist Series
Modular Telemedicine System

Designed for Multiple Clinical Care Applications

The **Clinical Assist: Series** is our latest telemedicine system, designed with an even lighter footprint than before! Built to accommodate multiple specialties, the Clinical Assist Series system allows you to start with your basic needs first and then expand your clinical needs as you go. This modular telemedicine systems comes in a variety of standard configurations and will support the integration of different PC platforms.

Standard Features

- Small, lightweight cart with a simple streamlined design.

- Integrated PC with Windows OS.

- Spacious work-surface area with a convenient one-touch height adjustment to allow for a full sit/stand range of motion.

- Locking storage drawer for additional medical supplies or devices.

- Single point of charge kit includes: fused AC inlet, 8ft hospital grade coiled power cord, and AC power distribution with 3 receptacles for powering customer equipment.

- Open architecture at wheel base allows user to maintain their normal walking stride.

- (4) 5" dual wheel premium casters (2 locking casters on front).

- FDA listed and MDDS compliant station, meets UL and CE standards.

The Clinical Assist Series II is Easy to Configure to Your Needs:

1. Select the platform & medical devices
