# Unified Communications Solutions

CRESTRON®

Crestron unified communications (UC) provide a consistent single client experience for presence, instant messaging, voice, video, and content sharing in meeting rooms of all sizes. Available in an integration-friendly kit and three complete packages, they provide all the equipment you need to build a best-in-class Microsoft® Skype® for Business collaboration experience.

The Crestron RL™ 2 codec is the engine that drives Crestron UC solutions, which boast unmatched features including a fully integrated DigitalMedia™ receiver, native Crestron Fusion® connectivity for room monitoring, multiple audio input configurations, and versatile mounting options.

"We are pleased to see Crestron deliver UC solutions for Skype for Business to extend the communications experience and connect people everywhere to achieve more, together."

Giovanni Mezgec, GM
Skype for Business
Product Marketing at Microsoft

Group Collaboration

Our full-featured system enables real-time group collaboration on conference room displays rather than on personal laptops. With just one touch of a button from the included touch screen, anyone can walk into a conference room and instantly start a collaboration session.

On-screen annotation

Ultra-responsive on-screen annotation brings presentations to life in a whole new way. With a finger swipe on the touch display, you can make your point; no more wasted time searching for that elusive stylus pen. And with no delay in touch response, you can annotate as fast as you think.

Complete room control from ONE touch screen

Crestron UC solutions are designed to seamlessly integrate with our enterprise class 3-Series Control System® to offer a complete room solution. Simply press the "RL" button to instantly access lighting, shades, thermostats, DigitalMedia, AV presentation, and more – all from the same touch screen.

Integrator Kit

For replacement of existing videoconferencing systems or custom-building a new unified communications system.

No display:
