My Meeting Video is a software client that turns your PC, Mac, Android or iOS tablet into a powerful videoconferencing device, allowing you to connect securely in high quality audio and video with your colleagues and business partners across the globe. Enjoy a point-to- point call with one of your contacts, or host a team meeting in your personal conference room where participants can join from any standards-based video system like Polycom or Cisco, from Microsoft Skype for Business (Lync), or even from a web-browser or a phone. Everything is hosted in the cloud with no need for any additional infrastructure.
