Solutionz, Inc. Announces the Launch of CardsOnline MyCloud, a Cloud-Based Student ID System for K-12 Education

FOR IMMEDIATE RELEASE

PACIFIC PALISADES, CA - MAY 30, 2023 – Today, Solutionz, Inc. launched its latest K-12 product, CardsOnline MyCloud. The cloud-based student ID system is designed to help schools create, track, and monitor data while ensuring the safety of campuses throughout their regions in California, Arizona, and Nevada.

The student ID system and software solution was built just for schools by Precision Business Machines (PBM) and ScreenCheck in 2009 and can streamline the production and operations of student ID cards across multiple campus locations.

The cloud-based technology features:

- **Authorized Remote Users**
  Authorized users can create ID Cards and manage the necessary tools and permissions from anywhere, making tasks easy to perform.

- **Custom Card Layouts**
  Upload a design or start from scratch with all the tools needed to bring the school's vision to life.

- **Role, Card, and Data Management Capabilities**
  Choose from default admin roles, create new ones, and easily monitor your cards and data.

- **Photo and Data Storage**
  Capture and store photos using the built-in webcam, upload an image, or use the IntelliTWAIN capture software.

- **Smart Device Compatibilities**
  Design and manage cards on all devices.

- **Supported Languages**
  English, Spanish, French, German, Swedish, and Dutch

As reliable identification solutions become increasingly necessary, technology that is easy for users to manage has the potential to revolutionize school districts by promoting safer campuses with efficient ID card systems.

PBM recognized the need for an improved student badging system and partnered with ScreenCheck to create CardsOnline MyCloud. Their research resulted in developing the Precision Cloud-Based ID System for education, which is effortless to use, lightning-fast, and easily accessible.

"As a father and a business owner, I firmly believe that thriving schools can transform the world. Said Matt Tumelson, President of Precision Business Machines. *"It is our responsibility to safeguard classrooms in America. Implementing ID badges is a significant step towards this larger goal, and we are here to make a massive impact."*
The innovative technology of CardsOnline provides fast and long-lasting results. Schools and districts across the country can choose to buy the printer individually or as part of a bundle that includes blank ID cards, lanyards, and the cloud-based CardsOnline management software.

The subscription for CardsOnline MyCloud is cost-effective for a single campus, department, or entire district. This allows schools to stay up-to-date with the latest software and updates without the need for expensive server infrastructure or IT expertise.

Users can secure access to the online software where they can connect their webcam or digital camera to snap student photos and print ID badges from the cloud. The mobile-friendly platform is fully compatible with any student information system, allowing secure authorization to access all their data anywhere. With CardsOnline, educators can seamlessly keep track of class schedules, extracurricular activities, transportation routes, medical information, and other customizable information.
